Using iRAP on Welsh Government's Strategic Road Network

Llywodraeth Cymru
Welsh Government

Background

Welsh Government is the highway authority for the trunk roads and motorways in Wales:

Motorway 262km

Dual carriageway 738km

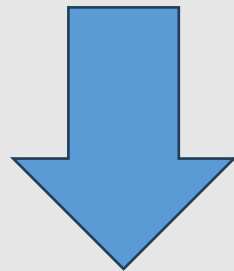

Single carriageway 1,181km

Keen to move to a proactive approach to improving road safety

Next steps once we had the survey:

- Improving the background/baseline data
- Prioritise the routes for detailed analysis
- Understand any conflicts between iRAP countermeasures and WG policies
- How best to deliver the countermeasures

Plan for a proactive approach to improving safety of the SRN
